This seeder is the latest and most perfect development of the hand seed drill. It sows evenly in drills, and also drops in hills at 4, 6, 8, 12 or 24 inches apart.

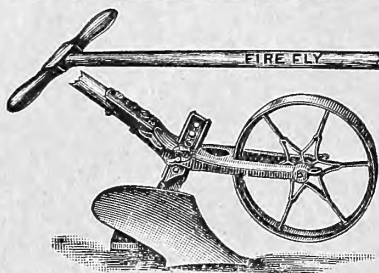

The accurate hill-dropping drill, which gives a regular stand of plants with the least seed, saves its cost over and over in seed alone. We guarantee this drill to be more accurate than any other made, and to give satisfaction in every respect.

Seeder, Single Wheel
Hoe, Cultivator and Plow**

Price, complete, \$10.00

It is the best implement in the world for the gardener. The hopper is big enough to hold two quarts of seed and it drops in hills 4, 6, 8, 12 or 24 inches apart. It covers seed the right depth and rolls down the soil. The flow is instantly stopped by automatic device. It's so easy and perfect working that its handling amounts to recreation in gardening.

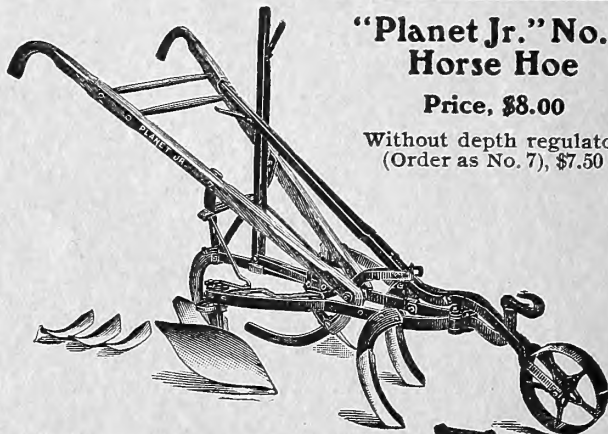

**Fire-Fly Plow
